- (1) set of magnet price tags

SPECIAL ORDER ONLY – CONTACT YOUR REPRESENTATIVE FOR DETAILS.

FLORAL KNIVES are used to handle a variety of tasks, but are primarily used for cutting stems. This group includes both folding and fixed blades. Folding knives can easily be stored in one's pocket for easy transport, while fixed blades are best suited for stationary tasks.

PRUNING KNIVES feature a curved blade, especially designed for tree nurseries and gardeners. Can be used for all types of pruning tasks, designed for easier cutting of branches and saplings.

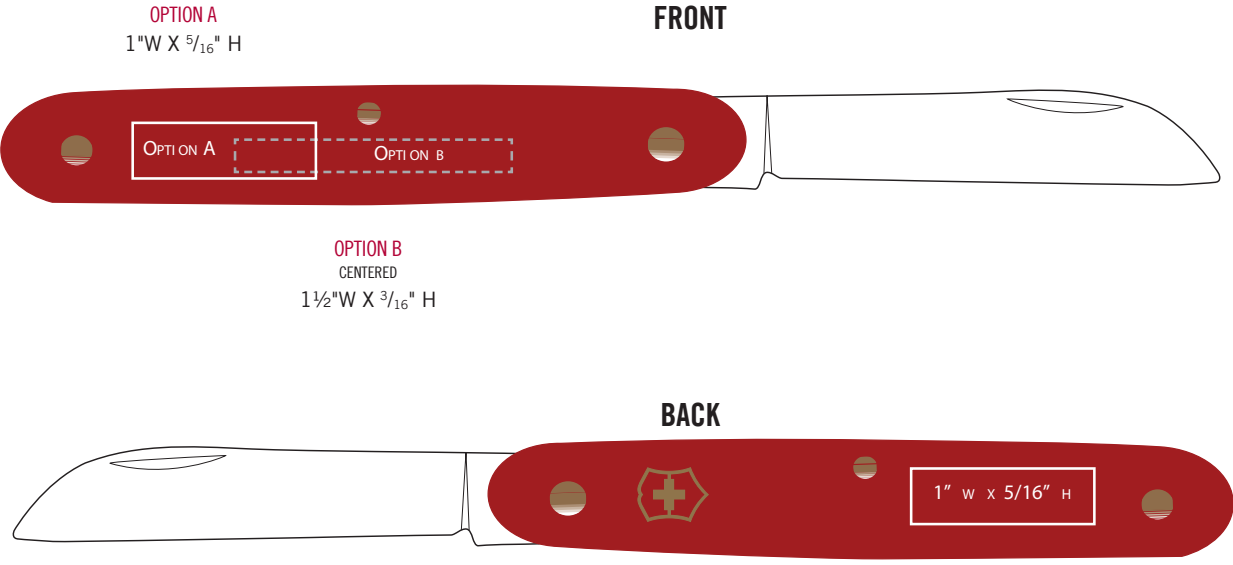

FLORIST SHEARS are best used to cut woody stems or florist wire. Unlike scissors, florist shears will cut through plant materials without pinching the stem.

RIBBON SCISSORS are recommended for cutting ribbon, netting, or fabric. These scissors should never be used to cut stems or wire, as damage to the blade will occur.

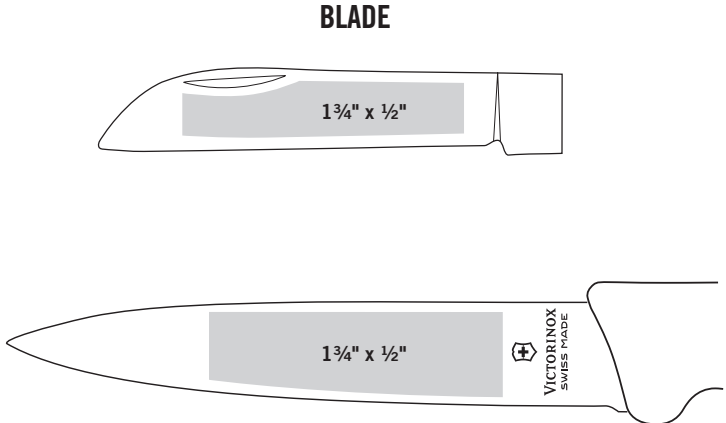

UTILITY SCISSORS, which include bent and clip-point models, can be used on a variety of materials, including paper and leaves.

WIRE NIPPERS are used to easily cut through varying gauges of floral wire. Having a separate tool for wire cutting will help prevent damage to scissors.
